

# ELASTIC MASKING PUTTY

80 gr.

AK8076

Reusable putty for masking areas when airbrushing. Specially designed to leave no residue on any surface. Can be easily removed without damaging other painted areas. Doesn't stain and is grease free. The best quality with the best price in a perfect product for modelers that can be adapted to any surface and allows both to make camouflages and to mask areas (such as wheels or clear parts) that don't want to be painted.

1 Place the masking putty around the areas you want to keep unpainted. And remember to use masking tape in areas like the windows

2 Its elastic consistency makes it very easy to apply. Take real photo references to match the desired camouflage.

3 Using the airbrush, paint comfortably the piece for the first camouflage color.

4 Remove the masking putty, and observe the fine results.

5 Again place the masking putty over the desired areas to apply the second camouflage color.

6 Apply the second color as we did before.

7 The result is a perfect fine camouflage and the masking putty can be cleaned and stored for the next use.
