STARFIGHTER™

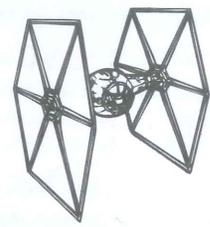

Disney MPC

MPC951

STAR WARS™

THE AUTHENTIC IMPERIAL TIE FIGHTER™

IMPORTANT!

READ THESE INSTRUCTIONS FIRST

Before beginning assembly read the instructions through, and test fit the parts without cementing. This will familiarize you with the location of parts, eliminating errors. It is best to use a modeler's knife for removing parts from the "runners", instead of twisting them off. Trim off excess, plastic or "Flash", and scrape paint from parts where they join other parts before cementing. AMT models are made of the highest quality styrene plastic, so only paint and cement made for styrene should be used. To join parts, use cement sparingly, being careful not to get cement on exposed surfaces. Apply cement with a toothpick to small parts. When painting the model, it is easier to cement all colored parts and paint the whole unit at one time. You should have no trouble assembling your kit if you follow the instructions. May the force be with you.
