

get ready:

- Insert the Cross Strut into Leading Edge Fittings, then slide the struts into Dihedral Center Molding.
- Make sure Turtle's Wings sweep backwards away from the Front Bridle.
- Attach your line to the Tow Point on the front of the kite.

PREMIER KITES

to fly:

Have a friend stand about 75 feet downwind from you and hold the kite with its nose pointed towards the sky. As the wind catches the kite, signal your friend to release it while you steadily pull in line until the kite is aloft. As the kite flies upward, slowly release more line.
