

## get ready:

- Insert Right Cross Strut and left Cross Strut into Dihedral Fitting and Cross Strut Fittings.
- Insert the tail strut into the tail pockets.
- Clip the tail streamers to the tail loop.
- Attach your line to the tow point.

### FRONT OF KITE

### BACK OF KITE

## to fly:

Have a friend stand about 75 feet downwind from you and hold the kite with its nose pointed towards the sky. As the wind catches the kite, signal your friend to release it while you steadily pull in line until the kite is aloft. As the kite flies upward, slowly release more line.

For more information about kites and kiting events in your area, visit the American Kiteflyers Association website: [www.aka.kite.org](http://www.aka.kite.org)  
Happy flying!
